

R_X Results to Prescription Plan

Save valuable time and get your patients on treatment sooner.

Your hyposensitization treatment set can be manufactured the same day on which results are available from our lab. In other words your treatment set can be produced within 24 hours of receipt of your serum sample in most cases.

Why wait several days until you have a copy of the results in your hands, then further waste valuable time placing an order if you know ahead of time that you plan to hyposensitize an animal with treatable allergies. Simply indicate your preferences for treatment or request that we call you to discuss your order as soon as your results become available. We will guarantee to begin manufacturing of your set(s) upon completion of testing and **ship to you within 3 days***.

* subject to satisfactory sterility clearance

SIMPLY COMPLETE THE FOLLOWING INFORMATION AND RETURN IT TOGETHER WITH YOUR SERUM SAMPLE FOR TESTING.

Veterinarian: _____	Animal: _____
Clinic: _____	Owner: _____
